FOLLOWER-RATED TRUST

Built two developer-first social audiences from zero, entirely organically. Took Lingo.dev's X account from nothing to 10.8K followers and 49.2M views in 10 months, no paid promotion, then grew a personal technical brand to 19K+ followers and 110M+ impressions — strong enough that a tech CEO found it and hired me without an application. Seven years self-teaching JavaScript and web development means the content reads like it's written by an engineer, not a marketer talking at one.

EXPERIENCE

Social Media Manager · Lingo.dev

May 2025 – Mar 2026 · Remote

@lingodotdev on X

- Grew the company's X account from zero to 10.8K followers and 49.2M organic views in 10 months — no paid promotion, no influencer partnerships.
- Expanded to Threads, generating 2M+ views within the first 90 days of launch; also distributed content across Facebook, Instagram, YouTube, and TikTok.
- Created repeated viral hits within the developer community (top post 1.2M+ views) by identifying debates engineers genuinely cared about.
- Owned community replies with technical accuracy and personality, building real trust with senior engineers — the account was rated 9/10 by followers in an internal survey.
- Tracked fast-moving industry shifts, including the rise of AI-assisted coding, to keep the brand voice credible and current.

Technical Content Creator · Personal Brand

2024 – Present · Remote

@RyanEls4 on X

- Grew a personal tech-focused X account to 19K+ followers and 110M+ impressions — this account led directly to an inbound job offer from a tech CEO.
- Drove repeated virality by focusing on specific engineering debates (array indexing, library bloat, tooling wars); top posts reached 2.8M and 2.1M views.
- Built a trusted audience by engaging as a hobbyist programmer rather than a marketer — content written as a peer, not a brand.

SKILLS

- Organic Audience Growth
- Developer Culture & Memes
- X / Twitter
- Threads
- Community Management
- Brand Voice Development
- Trend Analysis
- Technical Content Writing
- Multi-Platform Strategy
- JavaScript & Web Dev (self-taught)
- Video Production (script-to-edit)

EDUCATION

Self-Directed Technical Study — JavaScript & Web Development

2017 – Present · The foundation that makes the developer-facing content authentic, not performative.

Diploma in Film & Television Production

Cape Town Film & Television School · 1992 – 1995 · Full pipeline: scriptwriting, shooting, editing — useful for shorts, memes, and visual content.

"He grew our X account from near-zero to 10.8k followers and 49 million impressions in under 12 months, entirely organic, with a developer audience — one of the hardest groups to market to authentically. His content feels like it comes from a peer. That's not something you can fake."

— Max Prilutskiy, CEO & Co-founder, Lingo.dev (full letter available on request)
