PROFESSIONAL SUMMARY

Technical growth specialist combining web development literacy with high-signal content strategy to build tech audiences from scratch with zero paid spend. Grew Lingo.dev's X account from zero to 10.8K followers and 49.2M organic views in 10 months. Generated 150M+ organic impressions across platforms. Leverages hands-on programming experience and meme architecture to craft authentic content engineers actively engage with. Landed role through inbound outreach from a tech CEO via personal account reach. Recommendation letter from Lingo.dev's CEO available on portfolio.

EXPERIENCE

Technical Social Media Manager | [Lingo.dev](#) May 2025 – March 2026 | Remote

- **0-to-1 Audience Build:** Grew X account from zero to 10.8K followers and 49.2M organic views in 10 months with zero paid promotion, driving high-signal developer traffic to brand ecosystem.
- **Viral Engineering Content:** Produced technical posts and meme architecture exceeding 1.2M+ views by targeting real-world developer pain points and tooling debates.
- **Multi-Channel Expansion:** Launched and scaled Threads (2M+ views in 90 days) while managing Facebook, Instagram, YouTube, and TikTok content workflows.
- **Peer Community Engagement:** Managed technical replies and community discussions with architectural accuracy; internal surveys rated brand account interactions 9/10.
- **Trend Integration:** Monitored real-time industry shifts (including AI-assisted coding and tooling bloat) to maintain high brand relevance.

Technical Content Creator | [Personal Brand \(X\)](#) 2024 – Present | Remote

- **Organic Reach Scale:** Grew personal developer-focused account to 19K+ followers and 110M+ organic impressions — directly triggering an inbound offer from Lingo.dev's CEO.
- **Viral Technical Strategy:** Authored viral technical threads on core engineering debates (array indexing, library bloat, tooling selection); top posts reached 2.8M and 2.1M views.
- **Developer Trust Building:** Established authority by engaging as a peer developer rather than a traditional marketer, driving high comment-to-view ratios.
